Release Notes

SimBuck, Version 1.12-01, 15 September 2013

New features

This is the first release of Simbuck. Simbuck provides simplified global buckling calculations for exposed pipelines, in accordance with DNV-RP-F110 (2007). Simbuck also provides simplified global buckling calculations for buried pipelines (UHB) in accordance with DNV-RP-F110 (2007) and Palmer et. al. (1990). Please refer to User Manual and Verification Report for further details.

Limitation

64-bit version of Microsoft Office is not supported.
