Table of contents

1 Introduction 1
2 Documentation 1
3 Bug Fixes 1

1 Introduction

HydroMesh is a meshing tool serving several purposes:

- Create free surface meshes for Wadam
- Create a panel model from a Section model
- Create meshes for Wasim (replacing Wasim_Mesh)
- The free surface mesh can be created interactively or automatically

2 Documentation

Official Release V4.0.1. Updates since last official release V4.0.0.

3 Bug Fixes

- Free surface meshing when heel is not zero.

About DNV

We are the independent expert in risk management and quality assurance. Driven by our purpose, to safeguard life, property and the environment, we empower our customers and their stakeholders with facts and reliable insights so that critical decisions can be made with confidence. As a trusted voice for many of the world’s most successful organizations, we use our knowledge to advance safety and performance, set industry benchmarks, and inspire and invent solutions to tackle global transformations.

Digital Solutions

DNV is a world-leading provider of digital solutions and software applications with focus on the energy, maritime and healthcare markets. Our solutions are used worldwide to manage risk and performance for wind turbines, electric grids, pipelines, processing plants, offshore structures, ships, and more. Supported by our domain knowledge and Veracity assurance platform, we enable companies to digitize and manage business critical activities in a sustainable, cost-efficient, safe and secure way.
