# DONGLE LICENSE
# ERROR: INVALID HOST

The following page introduces the solution for error: Invalid host for dongle license.

**Error**:

When you launch application (take Sesam GeniE as example), if you meet license check failed dialog, click OK to close it. Below error messages pop up.

Above error is caused by below reason:

1. The dongle is not plugged in
2. The dongle is not match with this license file
3. The dongle hasn't been driven

**Solution**:

1. Plug in the dongle.
2. Check the HostID in license file, make sure it is same as it on Dongle.
3. Install the dongle driver (refer How to install dongle license or InstallationGuide_DongleDriverInstallation).
