

ERROR CAN NOT FIND LICENSE FILE

The following page introduces the solution for error: Cannot find license file.

Error:

When you launch application (take Sesam GeniE as example), if you meet license check failed dialog, click OK to close it. Below error messages pop up.

```
20200331_133953_GENIE.MLG - Notepad
File Edit Format View Help
Application name : GeniE
Application version : V7.14-05
ERROR: While checking out a licence.
Cannot find license file.
The license files (or license server system network addresses) attempted are
listed below. Use DNVSLM_LICENSE_FILE to use a different license file,
or contact your software provider for a license file.
Feature:          GENIE
Filename:         C:\flexlm\*.lic
License path:    C:\Flexlm\*.lic;
FlexNet Licensing error:-1,359. System Error: 2 "No such file or directory"
```

Solution:

Save or copy the license file you got from DNV in C:\Flexlm. This is the default location for the license file. Create the folder if it does not exist. If the license path in above error messages is not default path C:\Flexlm, please put the license file into the correct license path. Launch the application, it should be launched successfully. If no, you can refer document by [How to install standalone license?](#) and [How do I create edit license environment variables?](#) on Common Self Training Materials part.
