

## ERROR INVALID HOST

The following page introduces the solution for error: Invalid host.

### Error:

When you launch application (take Sesam GeniE as example), if you meet license check failed dialog, click OK to close it. Below error messages pop up.

```
20200331_141103_GENIE.MLG - Notepad
File Edit Format View Help
Application name : GeniE
Application version : V7.14-05
ERROR: While checking out a licence.
Invalid host.
The hostid of this system does not match the hostid
specified in the license file.
Feature:          GENIE
Hostid:           90b11c803379
License path:     C:\Flexlm\dnvs_90B11C803379.lic;
FlexNet Licensing error:-9,57
```

### Solution:

Above error indicates that the MAC address of the machine is not same with it in license file.

- Check the correct hostid (MAC address) of machine, refer below chapter
- Get the correct license file
- Contact [DNV support](#) to update license file with correct MAC address.

## CHECK HOSTID OF MACHINE

In command line, input ipconfig /all.

```
Command Prompt
```

```
P:\>ipconfig /all
```

Get the hostid (MAC address)

```
Ethernet adapter Ethernet:

Media State . . . . . : Media disconnected
Connection-specific DNS Suffix . : verit.dnv.com
Description . . . . . : Intel(R) Ethernet Connection (16) I219-LM
Physical Address. . . . . : CC-96-E5-62-2D-DA
DHCP Enabled. . . . . : Yes
Autoconfiguration Enabled . . . . : Yes
```
