HOW TO WORK REMOTELY TO ACCESSE A MACHINE
IN THE OFFICE

If you want to work remotely from home accessing a machine in the office, you can refer below suggestions about NH/Sesam/Marintek licenses.

- All floating network licenses support remote access
- All Marintek licenses (also standalone and dongle) support remote access (since they are counted and require installation of license manager to administrate the licenses)
- NH/Sesam standalone and dongle licenses <u>do not</u> support remote access.

Any more questions, please [contact](#) us.
